

SENSORY PLAY
THINGS TO DO WITH...

WATER

1. Use Paintbrushes of different thicknesses to 'paint' with the water - use fences, walls, the pavement and blackboards work really well too!
2. Fill a big water tray or bucket with water and bubbles- great fun and a great way to get those toys all cleaned too!
3. Put in a variety of objects of different colours, fish out and sort into colours, shapes etc...
4. Fill up water balloons and put them in the bath tub or water tray to explore. Lots of different experiences with slimey and squishy textures. Lots of fun to be had!
5. Use sponges in the water - have fun filling them with water and squeezing it out.
